Milestone 3 Checklist

8/01/2017

Jizhou Yang   Jul 27 (8 days ago) ☆ ◀ ▾
to Rafsan, me, beyu94, Takahiro, zsm767 ▾

Hello team,

Here is the review from Anthony. We need to do the following by the end of the day, Saturday 7.29.2017.
1   implement upload on live server. (Rafsan)
2   Access control.(login and register, Taka and me)
3   CSS work on UI (Raghav)
4   CTP templating (Raghav)

Brandon can continue on the search validation. Zach can continue on the back end. I am going to put these on the Trello.

Jizhou

Subject: CSC 648-848 Summer Section 01 Team 03 Milestone 3 Meeting

Hello Team 03,

1.

Hello Team 03,

Today was a good meeting.
The following items were noted during the meeting
- Need to test upload on live server
- Access control needs to be implemented
- No user upload
- Rework piping between features
- Need CSS work on UI
- Need to work on CTP templating

A checkpoint was set for end of the day, Saturday 7/29/2017:

The purpose of this checkpoint was
- Base CTP file for app, other pages extend this base CTP file

Please reply to this email when sending the checkpoint do not send from a different email.
PLEASE send UI pics and links to GitHub in the reply email.
Use PowerPoint if you have more than 1 UI pic.

Best,
Anthony J Souza

Hi Anthony,

We have updated the default.ctp and applied it to all our pages. We also completed the CSS work on UI (search result page). It looks great now. The login and register are working now. Please check it:

http://sfsuse.com/~su17g03/CSC-648-Su17-Team-3/gatorBaker/Home

Thanks

Team03

to Jizhou, Dragutin, beyu94, Rafsan, me, Takahiro, zsm767

Looks much better.

In the filter dropdown box, I would not use such a long default tag half of it is gone anyway.
Login in page needs some css/work and alignment. But it does work functionally.
Also after I login in, how do I know I am actually logged in? You may want to change the login button to 'Logged in as $username' or something like.

The tiles for the items look much better now too any more consistent.

Best,
Anthony J Souza

Hi Anthony,

Thanks for your advice. We will update the website.

Vertical product prototype (assessment, comments)

Instructor: please check architecture, PHP OO style, adherence to MVC pattern, coding style, SVN usage and comments, DB schema, adherence to secure best practices (PW encrypted, inputs validated, HTTPS used) etc.

Students: record feedback below

Runs from deployment server

Yes

Github organization (submission stats, organization of branches)

Master, Development

Github usage: Comments on positing; Number of posting to github; Appr. even distribution of submissions among team members (check github post stats for all members)

Even distribution among team members, and comments are appropriate

Code documented (header, in code) with good coding style:

Yes, coding style was good, and easy to follow and for other team members to catch on and code into different parts

MVC/OO patterns followed up:

Yes

Frameworks deployed correctly

Yes

Database organization (good DB tables as we spoke, categories in separate table):

Yes, we changed database organization as per feedback from Anthony during Vertical Protoype.

Check search code:

Search code and all filters correctly work

Adherence to best practices of security (PW encrypted, inputs verified, (HTTPS not required since we do not have sec. cert for now)

No HTTPS
PW encrypted

All inputs verified

Error messages on invalid inputs

Other

4. **Other things to check:**

P1 set of features committed? Team is focused only on P1s?

Yes we are focusing on and nearly finished with all p1 features

Teamwork: is the team working out, any related issues

No teamwork related issues

Digital content: status?

All digital content hosted on our servers is copyright free, and free to use.

Risks: all <u>actual</u>

– list them and develop strategy to mitigate them

No foreseeable risks.

5. **Comments and checkpoints (if any)**
We were given a checkpoint regarding UI issues, resolved it and replied before the deadline.
